Acknowledging that some Lightroom users want more control over their application, Adobe has continued to refine the user interface to make it easier to access and use all the tools and features. The latest feature is the new **Crop Tab**. It has been placed on the left side to make it visible in order to make it easier to use. That said, Adobe did not stop there, and added other useful tools, to include the ability to have multiple workflows, like the Touch Slideshow Workflow, which shows how images can be used in a creative way. And lastly, users can now work on fun projects, including virtual camera/phones and other fun ones. While some heavy editing may not be ideal for iPhones and for phones, we were able to work on the smartphone-processed images just fine. Starting Photoshop every version is an exciting event for all the designers. Every new version has a new feature introduced, which removes the need for the users to go through the tedious manual process of lowering the resolution or changing the color settings of the image to make it look more natural. With the new tooling, you can also edit shapes to remove parts, or cut out shapes in a gesture-driven way. The web has been a great platform for graphics, and the transition of the desktop into this new era has already proven to be easy for any images that have been launched on the web. But there are still problems with web graphics for the final product. You may notice that when you create a web graphic, it has no "print size". While a given type of graphic may not need print size for the final designs, it still needs it for the web. You have to make it fit the experience you'll have locally on your desktop, and for those who prefer print, print size is important. There is no built-in print size that will show you the final output, so you need to add it in yourself. Using the new web controls, however, you can add the print size. adidas has officially announced its latest sneakers, the football-inspired Adidas Nemeziz, which can be pre-ordered now on adidas.com. In January, adidas teased the sneaker and announced that the shoe would launch on June 14. This variant is the "Premier" version of the shoe, which starts at $180. The sneaker is available in black/gum colorway on the web, it features gum technology on the sole and sockliner, as well as additional foil print details. At the front end of the software stack, Adobe has released Photoshavenodes, which provide access to the integrated Lens Correction tool in Photoshop for iPhone and iPad (Android beta available soon). The difference in implementation from Photoshop Lenses is that these allow you to edit and optimize the images in your app rather than sending the images to the Symbology app in the system. The latest addition to Adobe Software for Mobile, Creative Cloud Companion, now supports iOS 13, and Windows 10 1909. The latest version of the software also allows different emails to be associated with different selectable groups, and the ability to access your data wherever it is stored. You can also create a series of frames on a single clip using the Anchor Point tool found in Photoshop Elements. You can also manage external graphics files through the Gallery, creating and editing overlays with different graphical formats. For testers of Creative Cloud software, Adobe has also introduced a new "new user" experience in both Bridge Suite 5 and Lightroom, that includes a pop-up window to help guide the new user through its various features. If you're not sure how to move files and settings around for new platforms, Adobe has also released a "Desktop User Guide" (opens in a new window) for its desktop applications, including Photoshop, Illustrator, InDesign, and so on.
